IMPORTANT TO OIL AND RAILWAY GREASE MERCHANTS AND FACTORS.

FOR SALE, at the Works at Weymouth, or may be delivered to any part of the kingdom, the superior product by distillation of BITUMINOUS SCHALE, or SCHISTUS, "LIQUID BITUMEN," containing, 1st, a Volatile Oil, or Mineral Naptha; 2nd, an Oil of a greater density; 3rd, a Fatty Mineral Oil; 4th, Paraffine; 5th, Grease, slightly alkaline; 6th, Tar. The Volatile Oil, or Mineral Spirit, is admirably adapted as a solvent, and may be used for all purposes to which the most highly rectified spirit of turpentine is employed, or may be used for spirit and coal-gas lamps. The second oil, not so very volatile, will dissolve in any proportion with seed or fish oils, of which it considerably augments their illuminating power, and prevents their becoming rancid. The third is admirably adapted for lubricating machinery, and contains—the 4th, Paraffine, which is easily obtained by crystallization, and requiring but little treatment to make excellent candles. The 5th, Grease, superior to animal oil or fat for the use of carriages. The 6th, Tar, perfectly black, very decisive, and which may be used generally for all purposes of varnish, and where mineral tar is employed.—And further information may be obtained either of Mr. W. C. HOMERSHAM, Saltram Works, Weymouth; or of Mr. C. F. CHEFFINS, 11, Southampton-buildings, Chancery-lane, London.

OXIDE of ZINC—SCOTT'S PATENT— an innocuous basis for all paints in lieu of white lead; equal to it in body, free from granulation. It may be applied with advantage to the manufacture of enamelled cards, paper-hangings, glazed pottery ware, coach-painting, and the bleaching of lace &c. Sold by the patentee's agents, Messrs. GRAY and CO., 27, Commercial Chambers, Mincing-lane.—N.B. Paints and all articles covered with oxide of zinc are unchangeable in colour, brilliant in effect, harmless in application, economical in use.

HUBBUCK'S PATENT WHITE ZINC PAINT.—ANNOUNCEMENT.

For MARINE USES, it possesses the following advantages:—It is whiter than any other Paint, and retains the whiteness for years, specifically lighter, a less bulge-water, or less vapours from cargo. The White Paint in the hold of a ship, after discharging a sugar cargo, is found to be as white as the year before, when newly painted. Under these and other circumstances, when every other paint hitherto known and tried has failed, the "White Zinc Paint" has preserved the fastness of its colour. Moreover, by virtue of its galvanic action on iron, it enters the pores, and forms an amalgam of the two metals, which protects the iron from rust, decay, or corrosion.

For the GENERAL PURPOSES of the decorative painter, the "White Zinc Paint" has been found unparalleled in whiteness, cleanness of colour, durability, and beauty of texture. It becomes so hard as to admit of polishing equal to the finest coach panelling.

For SANITARY PURPOSES the "White Zinc Paint" is valuable, not only from its being totally free from every ingredient injurious to health, but from the astringent chemical qualities which render it a powerful corrective where contagious diseases have prevailed; furniture or buildings painted with it are at once disinfected. Paralysis and Painters' Colic are avoided by its use, as well as similar results to the occupants of newly painted rooms. Apartments may be immediately occupied, without injury to the health of children or the most delicate constitution. It becomes cheaper than common paint, from its spreading over a much larger surface. 3 cwt. of this paint covers as much as is usually covered by 1 cwt. of white lead. Each cask is stamped with the name "Hubbuck—London.—Patent," as the style of the Manufacturers. A circular with full particulars may be had of the manufacturers, THOMAS HUBBUCK and SON, Colour Works, opposite the London Docks.
